## FIRST SCREEN:

Your participation will consist in filling in an online survey taking approximately 30 minutes on your own smartphone, tablet or PC. In this survey, we will ask you to answer some questions, in some cases after sharing some news or some Twitter accounts of important political actors. You should not share this information with other people besides yourself. For participating in this survey, you will receive as usual some points at the end of the survey.

Your participation is very important, so please take your time in responding. Current democracies are facing more and more challenges, and we really want to know your opinion about their functioning to study it scientifically together with the opinion of many more citizens to obtain a better understanding and comprehension. Academics and researchers around the world might use these data for their studies.

Participating in this study does not entail risks greater than those ordinarily encountered in daily life. We cannot and do not guarantee that you will receive any benefits from this study.

In order to protect your privacy, your data will be anonymized. This means that even the researchers will not be able to connect the survey answer you give to your personal information (your name, address, etc.). We will store your anonymous survey data in a secure place under key or digitally with safe access control mechanisms so that these can only be consulted by researchers of the current project. In case of data publication, this will happen anonymously. After completion of this research project, the anonymous survey data will be stored with a data archive so that it can be used by other researchers as well.

Your participation in this survey is completely voluntary and you can withdraw or opt-out of it at any time without needing to justify your decision. You have the right to omit answers to most questions except the ones used as filters.

This survey aims to provide the data necessary to analyse aggregate opinions on current political, social and economic events in your country. It is part of an international study led by researchers from the Pompeu Fabra University in Spain, within the framework of an international project taking place in some other countries. All of the information you and the other respondents provide will remain anonymous by erasing your personal information once the data collection process is complete. The anonymized data will be shared with the research team members from five different countries and will ONLY be used for academic research purposes. Should you have any questions on the research project, you may contact Mariano Torcal at [mariano.torcal@upf.edu](mailto:mariano.torcal@upf.edu)

The survey includes questions on your political opinions and attitudes.  
Below, we ask you to confirm if you would like to participate in this relevant survey.

Would you like to participate in this survey:

☐ Yes, I want to participate

☐ No, I prefer not to participate → END OF INTERVIEW

## **SECOND SCREEN:**

Your answers are very important and will help us learn the opinions of people living in Chile regarding the current political situation and the functioning of democracy in the country. The problems and challenges of our political and social systems require a good study of citizens' opinions and therefore your attentive and dedicated participation is essential for this study and to understand the major problems of current democracies. Your answers will remain completely anonymous and will only be subject to statistical analysis together with those of the hundreds of other participants.

This is a survey designed by a group of national and international researchers as part of a project led by a professor at the Pompeu Fabra University, who is interested in studying the opinions of people like you on issues related to political, economic and social events. Thus, you will be part of a group of 1,200 people from all over Chile participating in this study.

If you have doubts, complaints, or questions about this study or about your rights as a research participant, you may contact UPF's Institutional Committee for the Ethical Review of Projects (CIREP) by phone (+34935422186) or by email ([secretaria.cirep@upf.edu](mailto:secretaria.cirep@upf.edu)). CIREP is not part of the research team and will treat any information you send confidentially.

### THIRD SCREEN

In accordance with the General Data Protection Regulation (GDPR) 2016/679 (EU) we provide the following information about this survey:

**Data controller:** You can contact Netquest Data Protection Officer by sending an email to Will Hammond at [dpo\\_germany@gfk.com](mailto:dpo_germany@gfk.com)

**Purposes of the processing:** Carrying out the above mentioned research project. Personal data will be kept during the execution of the project and one more year after its finalization for its scientific validation.

**Legal basis:** Data owner's consent. You can withdraw your consent at any time.

**Recipients:** Your personal data will only be processed by the PI of this project. Your personal data may also be processed by subcontractors after the signature of a data processing agreement preserving your privacy and will not be transferred to third parties without your consent, except when otherwise provided for by law. The members of the research team will only receive the anonymized dataset for the statistical analysis where all the personal data will be already removed.

**Rights:** access, rectification or erasure of your personal data, as well as data portability and the restriction or objection to the processing of your personal data. Rights may be exercised by contacting UPF's General Manager ([gerencia@upf.edu](mailto:gerencia@upf.edu)). You have the right to lodge a complaint with the Catalan Data Protection Authority if you think we have not properly managed your rights.

We'd like to start by asking you this:

p1a\_1 Do you have a Twitter account?

1. Yes.
  2. No.
- 

## EXPERIMENT:

PROGRAMMER: FOR ALL EVEN THOSE NOT HAVING A TWITTER ACCOUNT

PROGRAMMER: RANDOMLY SELECT OPTION A OR OPTION B (variable esmP0a\_1).

### OPTION A (esmP0a\_1 =0)

We want to know your opinions about some issues related to current politics. But first we would like to provide you with some information about some of the discussions that are taking place among leaders and voters related to the current political and social situation.

To this aim we would like to ask you to follow a Twitter account from a list we will provide. We invite you to choose one or two of them (at most), read what is being discussed; you may even participate in the discussions if you wish – the choice is yours. We would like you to follow those discussions during the next seven days. After that time has passed, we will get back in touch with you to resume this survey.

### OPTION B (esmP0a\_1 =1)

We want to know your opinions about some issues related to current politics. We would like to provide you with some information about some of the discussions that are taking place among leaders and voters related to the current political and social situation. Despite the presence of some fake news and misinformation, Twitter is becoming a very good source of information about what leaders and parties think about current issues. Additionally, it can contain very informative videos and news articles. We therefore encourage you to follow one of the Twitter accounts we are going to provide you.

To this aim we would like to ask you to follow a Twitter account from a list we will provide. We invite you to choose one or two of them (at most), read what is being discussed; you may even participate in the discussions if you wish - we leave that to your discretion. We would like you to follow those discussions during the next seven days. After that time has passed, we will get back in touch with you to resume this survey.

esmP0b\_1. Would you like to participate in this experiment?

We would also like to know your feelings about some groups of people in Chilean society, using this thermometer.

Ratings between 60 and 100 mean that you have rather favourable feelings toward that group of people, with 100 being very favourable; while ratings between 0 and 40 mean instead that you have rather unfavourable feelings toward the group, with 0 being very unfavourable. If you do not have particularly favourable or unfavourable feelings toward a group, you should choose a 50 grade rating.
